Notes to the Financial Statements for the year ended March 31, 2015

1. Significant accounting policies

A. Basis of Accounting

The financial statements have been prepared in accordance with the generally accepted accounting principles in India ('Indian GAAP'), Accounting Standards notified under Rule 7 of the Companies (Accounts) Rules, 2014, the provision of Section 133 of the Companies Act, 2013 (the "2013 Act").

B. Use of Estimates

The preparation of financial statements requires the Management to make estimates and assumptions considered in the reported amounts of assets and liabilities (including contingent liabilities) as of the date of the financial statements and the reported income and expenses during the reporting year. Management believes that the estimates used in preparation of the financial statements are prudent and reasonable. Actual results could differ from these estimates. Any change in such estimates is recognised prospectively.

C. Revenue Recognition

- Revenue is recognized to the extent that it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured.
- Income from services is recognized as per the terms of contracts on accrual basis.
- Interest income on deposits is recognised on a time proportion basis taking into account the amount outstanding and the rate applicable.
- Profit/loss on sale of investments is recognised at the time of actual sale/redemption.
- Dividend is accounted when the right to its receipt is established.
- Rental income is recognised on accrual basis.

D. Tangible and Intangible fixed assets

Tangible fixed assets are stated at cost of acquisition including any cost attributable for bringing the asset to its working condition, less accumulated depreciation.

Intangible fixed assets comprising of software licenses are stated at cost of acquisition including any cost attributable for bringing the asset to its working condition, less accumulated amortisation.

Any expenses on such software licenses for support and maintenance payable annually are charged to the statement of Profit and Loss.

E. Income Taxes

Current tax is determined as the amount of tax payable in respect of taxable income for the year as determined in accordance with the provision of Income Tax Act, 1961.

Deferred tax is recognised on timing differences, between taxable income and accounting income that originated in one period and is capable of reversal in one or more subsequent periods. Deferred tax assets are recognised with regard to all deductible timing differences to the extent it is probable that taxable profit will be available against which deductible timing differences can be utilised. When the Company carries forward unused tax losses and unabsorbed depreciation, deferred tax assets are recognised only to the extent there is virtual certainty backed by convincing evidence that sufficient future taxable income will be available against which deferred tax assets can be realised. The carrying amounts of deferred tax assets are reviewed at each balance sheet date and reduced by the extent that it is no longer probable that sufficient taxable profit will be available to allow all or a part of the deferred tax asset to be utilised.

Minimum Alternate Tax (MAT) credit is recognised as an asset only when and to the extent there is convincing evidence that the Company will pay normal Income Tax during the specified period. In the year in which the MAT credit becomes eligible to be recognised as an asset in accordance with the Guidance Note issued by the ICAI, the said assets is created by way of a credit to the Statement of Profit and Loss.

F. Provisions and Contingent Liabilities and Contingent Assets

A provision is recognised when the Company has a present legal or constructive obligation as a result of past events and it is probable that an outflow of resources will be required to settle the obligation, in respect of which reliable estimate can be made. Provisions are not discounted to their present value and are determined based on best estimate required to settle the obligation at the Balance Sheet date.

Notes to the Financial Statements for the year ended March 31, 2015

These are reviewed at each Balance Sheet date and adjusted to reflect the current best estimates.

A contingent liability is a possible obligation that arises from past events whose existence will be confirmed by the occurrence or non-occurrence of one or more uncertain future events beyond the control of the Company or a present obligation that is not recognized because it is not probable that an outflow of resources will be required to settle the obligation. A contingent liability also arises in extremely rare cases where there is a liability that cannot be recognized because it cannot be measured reliably. The Company does not recognize a contingent liability but discloses its existence in the financial statements. Contingent Assets are not recognised.

G. Cash and Cash Equivalents

Cash and Bank Balances that have insignificant risk of change in value including term deposits, which have original durations up to three months, are included in cash and cash equivalents in the Cash Flow Statement.

H. Investments

Investments are classified under two categories i.e. Current and Long Term and are valued in accordance with the Accounting Standard (AS) 13 on 'Accounting for Investments'.

'Long Term Investments' are carried at acquisition / amortised cost. A provision is made for diminution other than temporary on an individual investment basis.

'Current Investments' are carried at the lower of cost or fair value on an individual investment basis.

I. Depreciation and Amortisation

Depreciation/Amortization on fixed assets is calculated on a straight-line which reflect the management's estimate of the useful lives of respective fixed assets and are greater than or equal to the corresponding rate prescribed in Schedule II of the Companies Act, 2013.

- Fixed assets costing ₹ 5,000/- or less are fully depreciated in the year of installation.
- Depreciation is charged for the full month in the month of purchase/sale even used for part of the month.

Consequent to the adoption of Schedule II to the Companies Act, 2013, the depreciation for the year ended March 31, 2015 is higher and the profit before tax is lower by ₹ 8.00 lacs.

Further, an amount of ₹ nil (net of tax of ₹ nil) has been charged to the opening reserves as on April 1, 2014 pursuant to the Companies Act, 2013.

J. Earnings per share

Basic and diluted earnings per share are computed in accordance with Accounting Standard-20 – Earnings per share.

Basic earnings per share is calculated by dividing the net profit or loss after tax for the year attributable to equity shareholders by the weighted average number of equity shares outstanding during the year. Diluted earnings per equity share are computed using the weighted average number of equity shares and dilutive potential equity shares outstanding during the year, except where the results are anti-dilutive.

K. Retirement and other employee benefits

Short term employee benefits:

All employee benefits falling due wholly within twelve months of rendering the services are classified as short-term employee benefits. Benefits such as salaries, short term compensated absences etc. and estimated variable remuneration are recognized in the period in which the employee renders the related service.

Post employment benefits:

(a) Defined contribution plans:

The Company's provident fund and pension are defined contribution plans. The contribution paid/payable under the scheme is recognized during the period in which the employee renders the related services.

(b) Defined benefit plan

The Company's gratuity scheme is defined benefit plan. The employee gratuity obligation is determined based on actuarial valuation using Projected Unit Credit method which recognizes each period of service as giving rise to additional unit of employee benefit entitlement and measures each unit separately to build up the final obligation.

Notes to the Financial Statements for the year ended March 31, 2015

The obligation is measured at the present value of the estimated future cash flows. The discount rate used for determining the present value of the obligation under defined benefit plans, is based on the market yield on government securities of a maturity period equivalent to the weighted average maturity profile of the related obligations at the balance sheet date.

Actuarial gains and losses are recognised immediately in the statement of profit and loss.

(c) Long Term Employee Benefits:

Accumulated leave, which is expected to be utilized within the next twelve months, is treated as short-term employee benefit. The Company measures the expected cost of such absences as the additional amount that it expects to pay as a result of the unused entitlement that has accumulated at the reporting date.

The Company treats accumulated leave expected to be carried forward beyond twelve months, as long-term employee benefit for measurement purposes. Such long-term compensated absences are provided for based on the actuarial valuation using the projected unit credit method at the reporting date. Actuarial gains/losses are immediately taken to the statement of profit and loss and are not deferred.

The Company presents the entire leave as a current liability in the balance sheet, since it does not have an Unconditional right to defer its settlement for twelve months after the reporting date.

L. Impairment of Assets

Tangible fixed assets and intangible fixed assets are reviewed for impairment whenever events or

changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognised for the amount by which the asset's carrying amount exceeds its recoverable amount, which is the higher of the asset's net selling price or its value in use.

M. Commitments

Commitments are future liabilities for contracted expenditure. Commitments are classified and disclosed as follows:-

- a. Estimated amount of contracts remaining to be executed on capital account are not provided for.
- b. Other non cancellable commitments, if any to the extent they are considered material and relevant in the opinion of the management.

N. Borrowing Costs

Borrowing cost includes interest and exchange differences arising from foreign currency borrowings to the extent they are regarded as an adjustment to the interest cost.

Borrowing costs that are attributable to the construction of a qualifying asset are capitalised as part of cost of such asset till such time the asset is ready for its intended use. A qualifying asset is an asset that necessarily requires a substantial period of time to get ready for its intended use. All other borrowing costs are recognised as an expense in the period in which they are incurred.

O. Cash flow Statements

Cash flows are reported using the indirect method whereby cash flows from operating, investing and financing activities of the Company are segregated and profit before tax is adjusted for the effects of transactions of non-cash nature and any deferrals or accruals of past or future cash receipts or payments.
